Career Objective

Applying for the position of React developer having hands-on experience efficiently coding websites and applications using modern HTML, CSS, and JavaScript, React JS. Translate designs to front-end code, estimate time and costs, and determine developer requirements and specifications. Collaborate with creative and development teams on the execution of ideas and projects.

Skills

HTML | CSS | Javascript | React js | React native | Nextjs | Redux | Typescript | Git

Visual studio code

Professional Experience

React Developer, CodeBin - Invasion Technologies Pvt. Ltd.

2022 Mar – present
Pune, India

Internship In MERN stack development,DevTown

2021 Aug – 2021 Nov
Remote, India

Projects

Maple Health Pharmacy

Maple Health Pharmacy is a web based user-friendly online platform for a medical store, making it easy for customers to shop for medical supplies. The website offers various features to improve the overall user experience.

Technology - React.js,Tailwind Css, Next.js,Typescript,Contentful
Roles and Responsibilities

- Optimized user experience with a sophisticated appointment booking system and improved communication through a reliable email system.
- Expanded platform services for vaccination scheduling, streamlined COVID-19 testing, and simplified prescription refills.
- Enhanced accessibility by enabling secure online ordering with doorstep delivery and integrating Google Maps for accurate navigation.
- Contributed to a visually appealing user interface with reusable components using Tailwind CSS.

Shopistry

Shopistry project, an innovative eCommerce platform aimed to easily create and customize their websites.

Technology - React.js, Tailwind Css, Next.js,Redux,Typescript
Roles and Responsibilities

- Developed and launched user-friendly "Theme Selection and Customization" feature.
- Implemented drag-and-drop interface for easy website customization.
- Ensured robust data management for accurate user customizations.
- Collaborated on visually appealing themes for cross-device compatibility.
- Worked in Agile environment for timely delivery and continuous improvement.

Leave Management System

The Leave Management System is a web application designed to streamline and automate the process of managing employee leave requests within an organization.

Technology - React.js,Styled Components,Storybook,Redux,Typescript
Roles and Responsibilities

- Developed reusable UI components (Header, Sidebar, Navbar, Button, Card Employee, Filter, Input, Holiday Item).
- Ensured design consistency with Styled Components for a visually appealing experience.
- Integrated TypeScript for improved code quality and enhanced development tooling.
- Utilized Storybook for developing, documenting, and testing components in isolation, facilitating team iteration on UI elements.

Milk Management System

The Milk Management System is a web-based application designed to maintain daily milk records for registered members and generate comprehensive reports

Technology - React.js,Tailwind Css,Redux,Typescript
Roles and Responsibilities

- Design and develop responsive user interface components for Milk Management System using HTML, CSS, JavaScript
- Implement efficient state management with Redux for data consistency and real-time updates.
- Collaborate with backend developer to integrate frontend components with API endpoints.
- Ensure responsiveness and compatibility across devices and browsers.

Incerro ⌕

Our web platform connects clients, showcasing our company's technologies and services in a user-friendly space.

Technology - React.js, Tailwind Css, Next.js,Redux,Typescript
Roles and Responsibilities

- Develop reusable components using Tailwind CSS for a consistent design.
- Implement responsive design to ensure optimal viewing on all screens and Integrate mail sending functionality using Nodemailer.
- Integrate Contentful API to fetch and display data on the frontend and Create forms for user interaction on the website.
